- included:**
- 1 R300 tool
 - 4 nosepieces Ø3.0 to 6.4
 - 1 mounting key
 - 1 additional set of jaws
 - Assortment of rivets (R300-S box version)

MANUAL

Installing the rivet

1 Choose the nosepiece corresponding to the diameter of the rivet to be set (nosepieces are stored under the collecting bowl)

2 Screw the nosepiece onto the nosepiece holder on the tool until it stops (key provided)

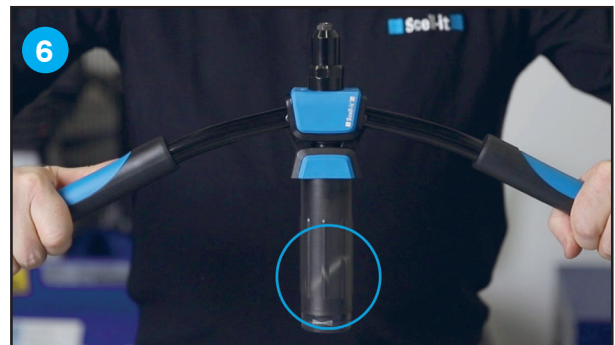

3 Fully spread the gripper arms

4 Insert the rivet mandrel into the nosepiece of the tool and the body of the rivet into the hole of the material to be assembled

5 Close the arms of the pliers to set the rivet. Repeat the operation if necessary until the rivet mandrel breaks.

6 After breaking the mandrel, hold the tool vertically and spread the arms to release mandrel into the collector.

How to change the nosepieces and jaws.
