

## Environmental Policy Statement

Scell-it UK Ltd shall ensure that our operations comply with and where possible exceed environmental legislation, approved codes of practice and other requirements to which the organization subscribes that relate to our environmental aspects whilst co-operating fully and maintaining open relationships with all regulatory authorities.

The company is committed to the process of enhancing its environmental performance and will continually measure and monitor standards and implement improvements whilst ensuring that all personnel are trained and aware of environmental issues and the environmental impact of their activities.

Scell-it UK Ltd are committed to increasing the percentage of materials recovered and recycled from the incoming stream of goods and reducing the amount of waste being land filled. We are dedicated to assisting our customers in reducing their environmental impact by providing additional advice and waste management plans.

Scell-it UK Ltd will use contractors and suppliers who hold environmental standards compatible with our own.

This policy will be communicated to all persons working for or on behalf of the organization and made available to interested parties and audited to ascertain that the information contained within it is understood and accomplished.

This policy will be reviewed periodically to ensure that it evolves with the company's activities and legislation as well as the needs and expectations of the community.

Adequate resources will be allocated for the development of the company environmental management system and for the training of all employees.

Scell-it UK Ltd will take all practical steps to prevent or diminish harmful impacts on the environment, which may result from all activities.

Scell-it UK Ltd will maintain and Environmental Management protocol throughout its operations subject to recognized environmental programmes. The system will include the requirement for a report and audit programme which will be designed to progressively reduce the impact of the company's operations in key environmental areas.
